

Medicare-New Modifications to the POS Codes for Telehealth

October 22, 2021

The POS code set provides setting information necessary to pay claims correctly. At times, the health care industry has a greater need for specificity than Medicare. While Medicare doesn't always need this greater specificity to appropriately pay claims, it adjudicates claims with the new codes. This eases coordination of benefits and gives other payers the setting information they need. The POS Workgroup is revising the description of POS code 02 and creating a new POS code 10 to meet the overall industry needs, as follows:

1. POS 02: Telehealth Provided Other than in Patient's Home

Descriptor: The location where health services and health related services are provided or received, through telecommunication technology. Patient is not located in their home when receiving health services or health related services through telecommunication technology.

2. POS 10: Telehealth Provided in Patient's Home

Descriptor: The location where health services and health related services are provided or received through telecommunication technology. Patient is located in their home which is a location other than a hospital or other facility where the patient receives care.
