

# \$0 Co-Pay for Routine Podiatry Visits-2019 MVP Medicare Advantage Plan-Members Living with Diabetes

---

**April 08, 2019**

MVP along with many other insurance companies are sending out preventive care notices/suggestions to raise awareness on conditions that can be controlled or managed through preventive care.

Insurance companies are making it cost effective for patients to be treated for the routine footcare procedures related to the diabetic condition of the patient by waiving the copays for those particular visits.

This does not take away from the plan paying the full allowable amount for the procedure.
