

# EmblemHealth Pre-Authorization Lists

---

## June 27, 2019

EmblemHealth is focused on ensuring members receive services in clinically appropriate settings. A few weeks ago, they announced upcoming changes to the pre-authorization list and they are providing you with an update to their previous announcement.

They will implement the additional codes to their existing EmblemHealth Prior Authorization list on August 1, 2019. The implementation date has changed from what was previously announced (July 1, 2019).

Beginning August 1, 2019, they will supplement with 99 codes that have site of service rules. These codes apply to Commercial and Medicaid lines of business only. **(Click on link below-Podiatry related codes are highlighted)**

The site of service rules identify procedures that do not require a pre-authorization if performed in certain medical settings. For the Commercial and Medicaid lines of business, there are certain procedures performed in an office setting (POS 11) or in an ambulatory surgery center (POS 24) that do not require pre-authorization.
