

New York State Workers Compensation -Transition to E-Billing

September 05, 2019

Effective January 1, 2020, all New York providers are **required** to electronically submit workers comp bills to payors. Providers will no longer be able to use the CMS 1500 form or forms C-4, C-4.2, OT/PT-4, PS-4, and C-AMR. Providers will also electronically submit documents regarding disputes for incorrectly reimbursed or unpaid bills.

As you can see, the final phase of changes makes electronic billing for workers' comp mandatory. However, New York State Workers' Compensation Board (**WCB**) will establish an exception process for providers who are unable to meet the mandatory electronic billing requirements.

The Board created two websites to support the change to the CMS 1500:

- ⇒ [**CMS-1500 Initiative**](#) which includes the technical specifications, and
- ⇒ [**CMS-1500 FAQ**](#)
